

ASAP CAREERS

Use the Adaptation Careers Program to excel in your current job or find new work opportunities.

Find climate adaptation information and training

ASAP partners with leaders in climate adaptation information delivery to make it easy for you to find the information resources you need to do your job well and stay up to date on leading practices, and ensure those resources are coming from vetted sources. **Your ASAP Digest** is your personalized connection to the latest in climate adaptation news and ASAP members. You choose your topics of interest and we send curated information to you from the ASAP website, Georgetown Climate Center, USDA Forest Service, and Climate Access.

Advance your career with curated jobs and opportunities

Opportunities

ASAP Member Discount for Climate City Expo (CCx)

March 29 – April 7, 2019 | Asheville, NC

Climate City Expo (CCx) offers professional and experiential tracks for individuals to explore innovation at the forefront of adaptation and resilience. The heart of the experience is **CCx: Business**, a convening of global leaders and visionaries in science, sustainability, data, and entrepreneurship, to discuss risks, opportunities, and solutions to humanity's biggest challenges. **discount to CCx: Business, use the code CCxASAP.**

Free Workshop Opportunity: Scaling Green Infrastructure Investment Earth Economics is offering an exciting new track for municipalities and local agencies across the US who are ready to take their green infrastructure efforts to the next level. Interactive training workshops are designed to grow the capacity of municipal and local leaders to effectively scale investment in green infrastructure assets in their communities, through hands-on exercises and facilitated sessions. These workshops will bring together urban leaders and their private and community partners to work through barriers, identify actionable strategies, and ultimately advance a collective vision of adopting GI solutions at a scale necessary to simultaneously attract investment and create livable, resilient, communities. The labs build on The Blueprint for Green Infrastructure, a new web-based guide designed to support cities across the country to identify and scale investment in GI assets to scale. The Blueprint is based on ten months of extensive research, literature review, process mapping, and econometric modeling. To access the Blueprint and apply for a lab, email urbangi@earthconomics.org, or visit this link: <http://www.earthconomics.org/urbangi>. Apply

ASAP curates jobs, requests for proposals (RFPs), grants, and other opportunities to help you grow your work and your career on our website's **Jobs & Opportunities** page and in the ASAP Newsletter.

Join the Member Advisory Group on Professional Education

ASAP's **Member Advisory Group on Professional Education** builds ASAP's understanding of member needs and preferences for capacity building, explores exemplary resources and gaps in the professional education landscape, and helps define ASAP's role in the professional capacity building space. It includes interested ASAP members spanning all career stages as well as hand-picked professional education experts from the academic, private, and government sectors.

Be a mentee in the Mentorship Program

The **ASAP Mentorship Program** connects emerging climate resilience and adaptation professionals with accomplished ASAP members. The program provides a nine-month framework for engagement focused around the needs of the mentee, and gives the mentor an opportunity to share their professional knowledge, experience, and network.

Learn the state of the adaptation profession

Each year, ASAP surveys adaptation professionals from across North America to learn how the profession is changing and how we can help grow available jobs, tailor professional development opportunities, and best support the adaptation workforce.

Find professional guidance resources

ASAP's **Code of Ethics** and **Living Guide to the Principles of Climate Change Adaptation** help you assess your adaptation practice and make sure it incorporates the latest thinking on what constitutes ethical, equitable, effective adaptation. Whether you're a student or a seasoned professional, ASAP Professional Guidance will help you take your climate adaptation career to the next level. See these resources in action in the ASAP Living Guide Workshop and the Climate Adaptation Service Registry application process.

JOIN ASAP!

ASAP connects and supports the people who are building climate resilience. Organizational and individual memberships available.
