Marty-please correct this space

Travers City, Michigan--
Stormwater/sanitary
sewer infrastructure

What makes it
difficult to fund?

Possible Funding and
Finance Mechanisms

put your
ideas here

Lots of agencies
involved

no dedicated
climate
resilience staff

lack of
staff
capacity

As a smaller
municipality, may not
have capacity to do
resilience and
adaptation planning --
look to partner with
County or regional level
for your vulnerability
assessments, and
gather data on needs
and assets as a start.

hazard mitigation plan
funding (not necessarily
the FEMA emergency
funding)

Look to federal and
state funding
mechanisms
coming out with
new legislation-- get
on EPA and DOE,
HUD, EDA and
grants.gov etc.
listservs

find budget or
philanthropy and
non-profit CBO
partners (?) for
capacity building or
expertise to identify
blended funding
strategies together

Project Phase

Planning/Design,
Remediation

What makes it
difficult to fund?

Possible Funding and
Finance Mechanisms

Planning grants are highly competitive and few and far between, small communities don't have capacity, synching the calendars and timelines, for ensuring DEIJ considerations state agencies have their own processes and try to match them with city or municipality processes is sometimes difficult
